Employee Data Summary – Excel

Project Overview

This project summarizes employee data by department, job role, and salary using Microsoft Excel.

Objectives

- Analyze employee distribution by department.
- Compare average salaries across departments and roles.
- Practice PivotTables and grouped workforce analysis.
- Present findings using three charts.

Tools Used

- Microsoft Excel
- PivotTables
- Charts and data summarization

Deliverables

- Employee Data sheet
- Summary sheet
- Department-wise average salary chart
- Role-wise average salary chart
- Department-wise employee count chart

Conclusion

This project demonstrates basic HR analytics skills by organizing employee information and comparing salary averages and workforce distribution across departments and roles.
